Arbree Solutions

- 04/21 – 07/23 | Frontend Developer (Reactjs, vuejs)
- **Projects I worked under this company**

  o https://aayaaz.com/ - E-commerce website similar to rokomari.com. The frontend was built using Next.js, Tailwind, and Redux Toolkit. I designed and developed the homepage, category page, contributed to the product details page, cart page and checkout page.

  o https://www.gprojukti.com/ - Electronics e-commerce site. Frontend using Next.js and state management Context API.

  o https://daahuk.org/ - Boat rental site. API developed with Django and frontend with Nuxt, Tailwind, Vuex. Frontend is fully responsible by me. Directly communicate with client about project and feature discuss. Project deployed in Digital Ocean and did maintenance task.

  o University of Asia Pacific - This is the official website of the University of Asia Pacific (UAP). In this project, I worked as a frontend developer and was responsible for the entire frontend using Nuxt, Bootstrap, and Vuex. I developed dynamic menu, submenu, and pages for various departments and schools. The website has more than 300 dynamic pages and handles administration, board of trustees, syndicate and academic council, statutory committees, tuition fees, tuition waiver, faculty, class schedule, exam schedule, admission test, admission result, tuition waiver and financial aid. It also includes information on schools, departments, IQAC (Institutional Quality Assurance Cell), events, news, notices, announcements, University club, department club, library, research, resources, alumni, and more. The website is ready to be published.

  o https://shoptheowlet.com/ - Clothing e-commerce site. I was fully responsible for the frontend, directly communicated with the client about the project and feature discussions. The frontend technologies used were Next.js, Bootstrap 4, and state management Context API. The website was hosted on Vercel.

SheBa Web Technology

- 04/20 – 04/21 | IT Executive

- **Projects that I've worked on under this company:**

  - https://zibonshathi.com/ - Matrimonial site using Bootstrap 4, Laravel 7. I developed both the frontend and backend by myself.
  - https://tessomotechnologies.com/ - Front-end with Bootstrap 4. Developed by directly communicate with African Client.
  - https://diisoafrica.com/ - Front-end using Bootstrap 4.
  - https://crm.shebawebtech.com/ - (Multi-Authentication and User Chat System and more using Larvel 7)
